Abstract: Energy states are defined from state 1 to state 10 in Physics of Chunbookyung.

Nonatomic energy lump is transpositioned by will power with chaotic frequency resonance, which is called UFO(undefined flying object).

The work blessing is moved to one's children by the chaotic resonance.

A transposition of mass lump is accomplished by will power, in which the will power supplies state 9 energy to state 8 one toward a specific frequency position.

1. Physics of Chunbookyung(天符經)

1-1. 一始無始一析三極無盡本天一一地一二人一三

In Chunbookyung there are ten states from 1 to 10. Each means leftwise positive (1), rightwise negative(2), rightwise positive(3), leftwise negative(4), chaos(5), leftwise positive plus leftwise negative(6), rightwise positive plus rightwise negative(7), leftwise positive plus rightwise positive(8), leftwise negative plus rightwise negative(9), and mass gap(10).

In the cycling it begins at 1 or 10. Under the environment 9, it begins 1 or 1. Under the environment 8, it begins 1 or 2. Under the environment 6 and 7, it begins 1 or 3. Additional laws are applied, for example 6 plus 4 make 10. The harmfulness of the watervein under the earth comes from that 6 plus 4 make 10 and then 3. The energy 3 is harmful to human being.

1-2. 一積十鉅無匱化三天二三地二三人二三

Each 1 accumulates and makes great 10(mass

gap). In the case, the three environments(6+7, 8 and 9) produce 2 and 3. The triple vector products make the mass gap and the atomic and molecular bondings (ref.8). Physics of Chunbookyung makes it possible to measure rotational electro - magnetic waves(ref.2).

1-3. 大三合六生七八九

1, 2 and 3 makes 6 and then produce 7, 8 and 9 in sequence. It makes tree (3,8), fire(2,7), earth(5,10), metal(4,9) and water(1,6), that is Hado(ref.9).

1-4. 運三四成環五七一

Rotating 3 and 4 makes a loop of 5, 7 and 1. The 7 makes chemical reaction(ref.10).

1-5. 妙衍萬往萬來用變

The energies come and go at one site repeatedly and regulatly, which can be applied for useful purpose(寄門遁甲)(ref.11).

1-6. 不動本本心本太陽昂明

It is the solar energy in basic nature.

1-7. 人中天地一一終無終一

The 6 and 7 make 8 and 9 and then produce 1 and 1, which produce cold fusion in human body. At

mass gap and 1, the cycling ends, which generates universal gravity by chaotic process.

2. Existence of UFO and Chaotic Resonance

Planet is moved by chaotic process, which is done by state 8 plus state 9 of Chunbookyung.

Atomic mass transposition by will power is done by the chaotic process and frequency resonance.

Nonatomic energy lump is transpositioned also by will power with the chaotic frequency resonance, which is called UFO(undefined flying object).

God is also a kind of UFOs.

UFOs can be seen by the difference with free space in a clear day.

A spaceman in UFO has different frequency from human being in Earth. And then they do not communicate with human being.

3. Work Blessing

A human body is transpositioned by normal chaotic process(state 8 plus state 9).

The blessing energy is moved to one's children by chaotic resonance.

Work blessing has been proved through many experiences.

A moving mass is governed by quantum physics(general relativity).

Because parents take over their gene codes to their children, work blessing occur easily between parents and their children.

4. Discussions and mass transposition

We have had many question about the existence of UFO.

And also the scientific meaning of it is much more questionable.

A chaotic process is from state 8 plus state 9 to state 5 while A implosive - deplosive process is from state 5 to state 8 plus state 9.

A driving control of UFO is done by will power.

A wishing of parent is accomplished by work - blessing process.

A transposition of mass lump is achieved by human will power, in which the will-power supplys state 9 energy to state 8 one toward a specific frequency(a specific position).

It needs a strong will power.
