

Volcano and Chunbookyung

Hung-Kuk Oh

Department of Mechanical Engineering, Ajou University, South Korea

Abstract: Temperature in earth does rise according to the depth, with which the heat generates from the earth itself. Magma is produced when continental plate and ocean one meets together under ground. Chunbookyung says that earth generates heat.

1. Heat in Earth

Conventional physics says that heat in earth comes from friction and break down of isotopes.

The friction comes from between continent plate and ocean one. The temperatures do not change from 10 to 20 meters under earth. The temperature after does rise according to the depth, with which the heat generates from the earth, we can estimate.

2. Physics of Chunbookyung(天符經)

2-1. 一始無始一析三極無盡本天一一地一人一三人一三

In Chunbookyung there are ten states from 1 to 10. Each means leftwise positive (1), rightwise negative(2), rightwise positive(3), leftwise negative(4), chaos(5), leftwise positive plus leftwise negative(6), rightwise positive plus rightwise negative(7), leftwise positive plus rightwise positive(8), leftwise negative plus rightwise negative(9), and mass gap(10).

In the cycling it begins at 1 or 10. Under the environment 9, it begins 1 or 1. Under the environment 8, it begins 1 or 2. Under the environment 6 and 7, it begins 1 or 3. The energy 3

is harmful to human being.

2-2. 一積十鉅無匱化三天二三地二三人二三

Each 1 accumulates and makes great 10(mass gap). In the case, the three environments(6+7, 8 and 9) produce 2 and 3. The triple vector products make the mass gap and the atomic and molecular bondings. Physics of Chunbookyung makes it possible to measure rotational electro - magnetic waves.

2-3. 大三合六生七八九

1, 2 and 3 makes 6 and then produce 7, 8 and 9 in sequence. It makes tree (3,8), fire(2,7), earth(5,10), metal(4,9) and water(1,6), that is Hado.

2-4. 運三四成環五七一

Rotating 3 and 4 makes a loop of 5, 7 and 1. The 7 makes chemical reaction.

2-5. 妙衍萬往萬來用變

The energies come and go at one site repeatedly and regularly, which can be applied for useful purpose(寄門遁甲).

2-6. 不動本本心本太陽昂明

It is the solar energy in basic nature.

2-7. 人中天地——終無終——

The 6 and 7 make 8 and 9 and then produce 1 and 1, which produce cold fusion in human body. At mass gap and 1, the cycling ends, which generates universal gravity by chaotic process.

3. Cause of Volcano

When continental plate and ocean one meets together, ocean one undergoes. At this time sea water comes into the earth. The heat in earth and high pressure from the sea water vapor make magma, which come out from the surface of the earth. Volcano zones enclose ocean then.

4. Conclusion

Chunbookyung says that earth generates heat, with which magma is produced when continental plate and ocean one meets together.
